(54) Title: **ORGANIC LIGHT EMITTING DIODE**

(57) Abstract: This invention generally relates to improved structures for organic light emitting diodes (OLEDs), and more particularly to so-called top emitting OLEDs. An organic light emitting diode (OLED) (300) comprising a substrate (102) bearing a light emitting layer (108a, b) between an electrically conducting anode (106) and an electrically conducting cathode (200), the diode being configured for light emission through said cathode, the cathode being transmissive at a light emission wavelength of the diode, and wherein said cathode incorporates an optical interference structure (202), (204), (206) configured to enhance light transmission through said cathode at said emission wavelength.
